

Attribute-Based Access Control

- For each operation we construct the effective authorization set in a pluggable and stackable way

Attribute-Based Access Control

- Expected in 0.98.3 or 0.98.4
 - Support for LDAP / Active Directory
 - Plugin will mix in auths corresponding to attributes of the subject's identity

Query

```
(&(objectClass=person)
  (userPrincipalName={0}))
```

Attribute Mapping

<attribute>: <regex> → <label>

memberOf: .+ -> \$1

division: .+ -> \$1

department: .+ -> \$1

employeeID: P[0-9]+ -> probationary
